

**REMARKS**

The new claims are presented to clarify that the present inventive composition and method are useful for promoting and maintaining neurological health as discussed generally at page 16, line 26 through page 17, line 16, and elsewhere in the application. These claims are presented to better claim the invention and to find improved wording of the preamble of the claims that may overcome some of the concerns of the Examiner expressed concerning the preamble in the Office Actions.

For the reasons given in the previous submissions, claims 1, 24, and 53 – 68 are believed to be patentable, and their reconsideration and allowance are respectfully requested. Also requested are reconsideration and allowance under 37 CFR 1.141 of previously withdrawn species claims 2 – 23 and 25 – 52. Since 52 claims including three were independent claims have been paid for, and the present application has 18 claims of which three are independent, no additional fee is seen to be required, but if a fee is required, please charge it to Deposit Account No. 50-1848.

Respectfully submitted,  
**PATTON BOGGS LLP**
